

## Bringing medical services directly to under-served communities where the needs are greatest.

Traditionally, pathology services have been offered through laboratory facilities or associated with hospitals or clinics. With advancements in technology, artificial intelligence and telemedicine, pathology services can now be provided remotely or through specialized service providers.

### About

Our solutions support diverse digital pathology in clinical, academic and research domains. The platform features a rapid Generative AI telepathology solution that is scalable and flexible, enabling integration within any ecosystem solutions and third-party applications. We empower pathologists to make better, faster and more informed decisions effortlessly on any device, anytime and anywhere! Laser focused on improving patient care and delivering better outcomes.

### Mission

ROSEAIld fulfills the specialized requirements of pathologists through the integration of advanced data analytics, streamlined workflow and diagnostics, providing real-time results for improved outcomes.

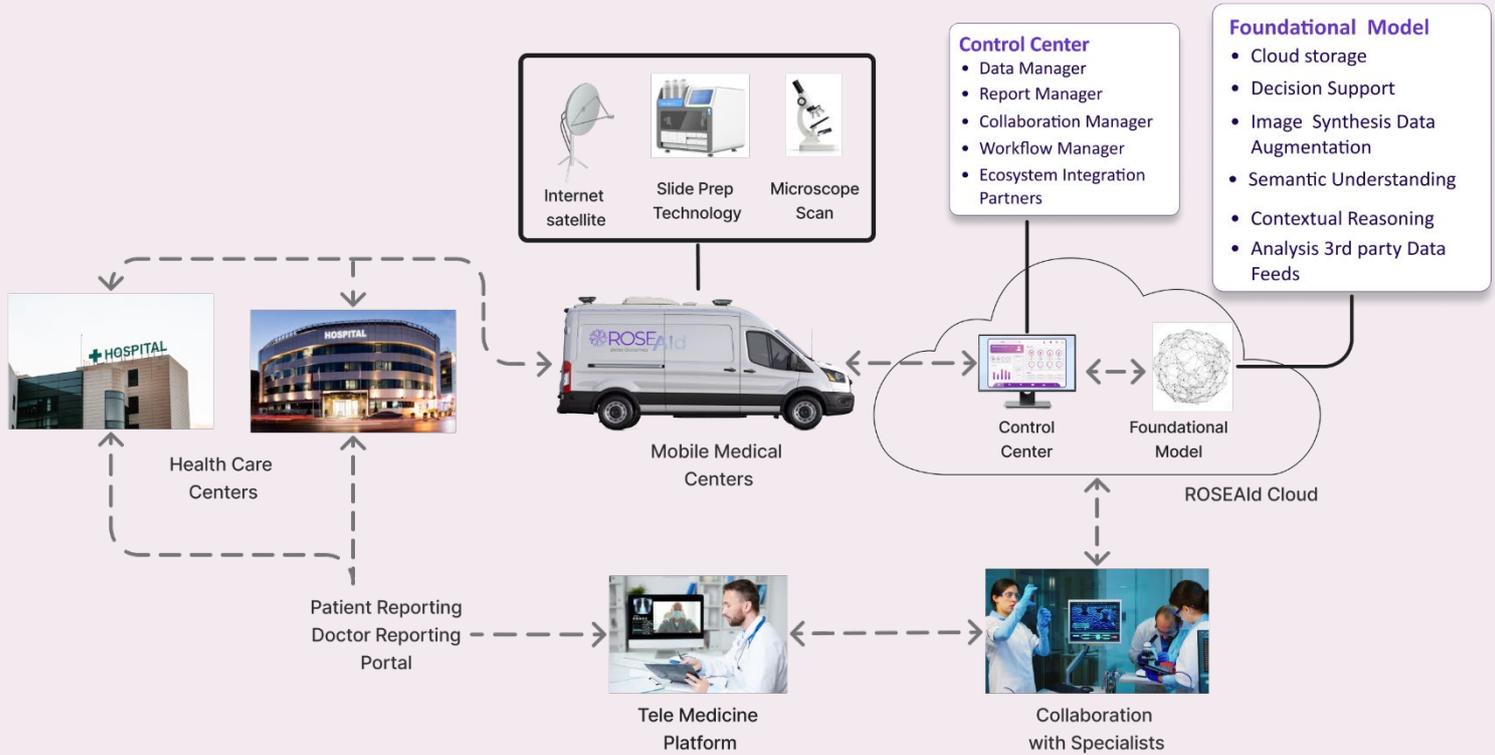

### Benefits

1. **Remote Diagnosis:** examination of samples remotely, enabling faster, more accurate and more convenient diagnosis for patients located in remote areas or those who cannot easily access traditional laboratory facilities.
2. **Digitization:** for slides and images, facilitating easier sharing of results and collaboration among healthcare professionals regardless of location 24 x 7.
3. **On-Demand Services:** obtain diagnostic insights promptly without the need for extensive infrastructure or in-house expertise.
4. **Specialized Expertise:** allowing healthcare providers to obtain second opinions or consultations from experienced pathologists or specialists as required.
5. **Integration with Healthcare Systems:** seamless transmission of patient data and integration with electronic health records (EHRs).
6. **Quality Assurance:** Provides rapid, accurate, and reliable results, ensuring HIPAA compliance for the encryption, security, and privacy of patient data, protecting it from unauthorized access whether in transit or at rest.

We improve access to pathology expertise by streamlining diagnostic processes and enhancing patient care through a combination of digital technology; Artificial Intelligence; and our remote service delivery models. PAAS helps reduce costs, increase productivity, and impact your bottom line, leading to better outcomes.

Our network of pathology specialists is fundamental in providing a comprehensive set of services. All physicians are all certified, licensed, and available to deliver results at the speed of now. Together with your local staff we will create a streamlined and effective service offering placing board-certified, pathologists on-screen in front of your local staff with minutes.

## Process Flow

## Solutions

Mobile Medical Centers equipped with a trained cytologist, slide preparation materials, technology, advanced microscope capabilities, connected to a cloud-based data platform with an AI assisted network of specialist pathologists across the internet/satellite spectrum is the future, today.

Connecting and collaborating in real-time with attending physicians, specialists and patients with the global pathologist network.
